

WE WORK TODAY TO KEEP BEING LEADERS TOMORROW

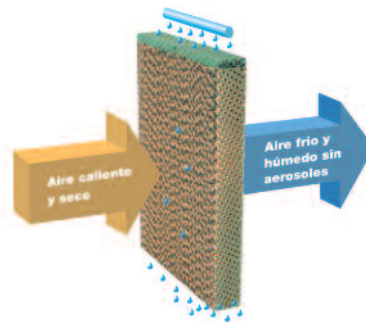

Design, manufacture and construction of sheds, farms, large projects and turnkey plants.

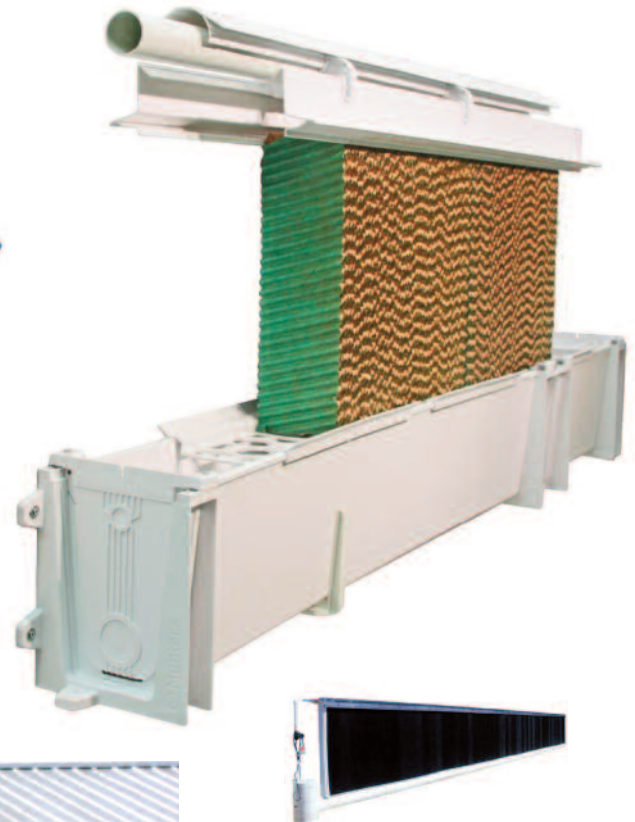

EVAPORATIVE PANEL SYSTEM

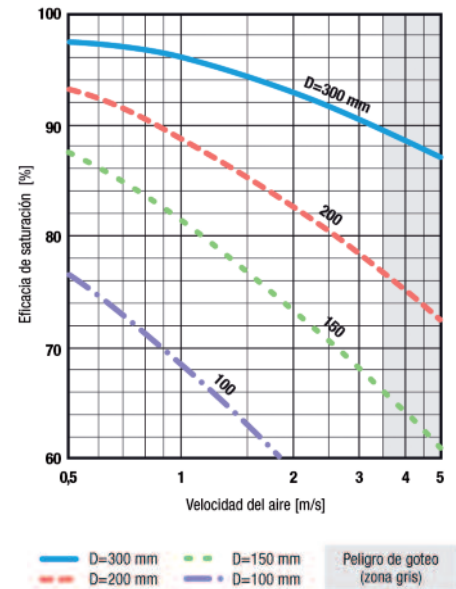

- High evaporation efficiency
- Superb wetting properties
- Low pressure drop when wet, leading to lower operating costs
- No water carry-over
- Low scaling
- Self cleaning
- Strong and self supporting
- Long life time
- Low running costs
- Quick and easy to install
- Environmentally friendly
- Consistent high quality

PRINCIPLE OF EVAPORATIVE COOLING.

SATURATION EFFICIENCY

GREAT SAVINGS ON INSTALLATION COSTS

- Drastically reduced installation time, no more drying time (and work time)
- Eliminate glue costs and Export-related issues
- Avoid risk of re-work due to wrong glue application (reduced margin of errors)
- No extra water tank needed (no digging, no extra costs)

EASY MAINTENANCE AND CLEANING

- Water discharge plug
- Large honeycomb pad support, avoid dust deposit or algae formation
- Easy removal of the pads
- No more water leakage due glue cracks
- No breakage issues due thermal expansion or contraction
